Sleeve

Practical protection with sustainable design. Sleeve is a soft case specially designed to protect our ergonomic mice and keyboards. It easily folds to fit different products and is a great accessory for when you're on the go. The soft felt fabric is made from recycled PET.

Benefits of Sleeve

Sleeve is the perfect accessory to protect your ergonomic mouse or keyboard on the go. Crafted from soft felt made of recycled PET, it combines sustainable materials with superior protection against scratches and minor impacts.

Sleeve's foldable format is designed for versatility, allowing it to adapt seamlessly to smaller products, ensuring a snug and secure fit. On the back, a smartly integrated pocket provides a dedicated space for storing cables, dongles, or other small essentials, keeping them separate from your devices to prevent unnecessary scratches.

Whether you're commuting to the office, traveling for work, or simply need a reliable storage solution, Sleeve ensures your devices stay in perfect condition. It's not just a protective case – it's a thoughtfully designed accessory with focus on functionality, style, and sustainability.
