Mousetrapper®

Armrest Asymmetric

The Mousetrapper armrest was designed with the user in mind. Whether you use it in combination with a Mousetrapper or not, it helps to relieve strain in your neck, shoulders, backs and forearms. Its design promotes a naturally centred and relaxed working position in front of your Mousetrapper or keyboard. This prevents the risks of carpal tunnel syndrome and strain injuries.

Benefits of armrest

Thanks to the uniquely thin central section, which is only 40 mm deep, it encourages you to work very close to the keyboard, which prevents over-stretching your forearms. The Mousetrapper armrest is easy to clean and disinfect, since the top surface is made from black artificial leather.

The Mousetrapper armrest comes with a set of two Z-shaped brackets as standard, which will fit most desks on the market. The desktop should not be thicker than 40 mm.

Facts

- Width: 680 mm
- Depth: 220 mm
- Height: 25 mm
- Waist: 40 mm
- Weight: 1400 g
- Product code: TB215
