Made in Sweden

Mousetrapper®

Mousetrapper Delta

Mousetrapper Delta is an exciting addition to our range of ergonomic mouse solutions. You control Delta with the help of Control Bar, our newly developed carbon fibre rollerbar, instead of our unique Control Pad. The Control Bar gives you a relaxed, centred position – and with 7 customizable buttons you can work even more efficiently. Delta is made in Sweden using recycled plastic.

Benefits of Delta

Delta adds a new dimension to Mousetrapper's wide range of centred, ergonomic mouse solutions. Its wide, unique carbon fibre Control Bar has a soft texture that enables you to work precisely and efficiently.

The length has been adapted to make the Control Bar easily accessible when you use the keyboard. The 4000 dpi resolution makes scrolling, clicking and zooming easy, and gives you an outstandingly precise feel while working.

The 7 programmable buttons offer you the freedom to create creative shortcuts to make your work easier. The functions of the buttons can easily be changed via MT Keys.

Delta has a USB hub to charge and/or connecting multiple devices.

Facts

Regular
Width: 19.7 inches
Height: 1.1 inches
Depth: 4.7 inches
Weight: 1.8 lbs
Product code: MT151, MT153

Extended
Width: 19.7 inches
Height: 1.1 inches
Depth: 5.7 inches
